

WE ARE HIRING

Position: DevOps Engineer

ABOUT US

Founded in late 2020 as a spin-off of the CISPA Helmholtz Center for Information Security, we strive to transfer research excellence to real-world products that support businesses and their surrounding ecosystem in understanding their vulnerability to attacks. Our mission is to provide actionable insights to secure your IT-infrastructure and protect our customer's business against attacks.

By combining OSINT and human ingenuity, our platform provides continuous monitoring of a company's external assets, allowing to proactively secure their entire attack surface. We collect and consolidate the publicly available information as observed from an attacker's perspective, prioritize it, and deliver actionable insights to reduce our customer's external attack surface.

We are a young company created by a group of security specialists and are at this point actively searching for and welcoming applications from motivated new team members.

YOUR TECH STACK

- Experience with CI/CD is a must
- Experience with Linux/Unix is a must
- Good understanding and hands-on experience with Git and Git workflows
- Experience with some of the configuration management and deployment tools like - Ansible, Puppet, etc.
- Good understanding of the software development life cycle
- Knowledge of at least one (modern) coding language - like Python, Java, Go, etc.
- Experience with a diverse range of infrastructure monitoring tools
- Experience with some of the cloud providers (Azure, AWS, etc.) is a plus

YOUR RESPONSIBILITIES

- As a devops engineer, you are responsible for automating and deploying workloads across multiple cloud providers
- You will be closely working with the software development team where you are going to discuss and create different deployment strategies and scenarios
- Support internal and external customers on different platforms and cloud providers

TO APPLY

Please send your latest CV to career@ais-security.de with the subject line "Application for the position of DevOps Engineer".

Please note that at this point AIS cannot sponsor any working visa, so before applying please be sure that you are legally authorized to work in Germany.

YOUR TEAM

- Flexible working hours, part-time possible
- Family friendly company
- Competitive salary and innovative product
- Great international team with mixed industry & academic backgrounds
- Atmosphere of learning and growing
- Young company with a flat hierarchy and lots of chances to get involved and have a say
- Tight connection to the world-class security research conducted at CISPA Helmholtz Center for Information Security and Saarland Informatics Campus

YOUR MISSION

- Bridge the gap between the software development and cloud deployment
