

WE ARE HIRING

Position: Senior Frontend Engineer

ABOUT US

Founded in late 2020 as a spin-off of the CISPA Helmholtz Center for Information Security, we strive to transfer research excellence to real-world products that support businesses and their surrounding ecosystem in understanding their vulnerability to attacks. Our mission is to provide actionable insights to secure your IT-infrastructure and protect our customer's business against attacks.

By combining OSINT and human ingenuity, our platform provides continuous monitoring of a company's external assets, allowing to proactively secure their entire attack surface. We collect and consolidate the publicly available information as observed from an attacker's perspective, prioritize it, and deliver actionable insights to reduce our customer's external attack surface.

We are a young company created by a group of security specialists and are at this point actively searching for and welcoming applications from motivated new team members.

YOUR KNOWLEDGE & ATTITUDE

- > 5 years of professional experience as a frontend developer
- Experience in mentoring younger developers
- Ability in taking ownership of the technical part of the product
- Track record in complete lifecycle, from conception to final launch

YOUR TEAM

- Flexible working hours, part-time possible
- Family friendly company
- Competitive salary and innovative product
- Great international team with mixed industry & academic backgrounds
- Atmosphere of learning and growing
- Young company with a flat hierarchy and lots of chances to get involved and have a say
- Tight connection to the world-class security research conducted at CISPA Helmholtz Center for Information Security and Saarland Informatics Campus

TO APPLY

Please send your latest CV to career@ais-security.de with the subject line "Application for the position of Senior Frontend Engineer".

Please note that at this point AIS cannot sponsor any working visa, so before applying please be sure that you are legally authorized to work in Germany.

YOUR MISSION

- Build our modern web frontend by applying the latest technologies and combining the art of programming with the beauty of design

YOUR TECH STACK

- Modern technology stack as React, Angular, Vue
- Modern Javascript (better Typescript)
- HTML5/CSS

YOUR RESPONSIBILITIES

- Focusing on building up the frontend of our platform
- You will be responsible for all design-relevant processes including the look & feel of our platform
- You will be working with the product team to define the product roadmap
- Providing guidance and mentorship to more junior engineers
